LEGEND

¹ Included in the assessment: a comprehensive history and physical examination; counseling/anticipatory guidance/risk factor reduction interventions; age-appropriate nutritional counseling; the calculation of Body Mass Index (BMI); newborn metabolic/hemoglobin screening and follow-up; growth measurements and head circumference; an oral dental exam; blood lead (BL) risk assessment; blood pressure risk assessment; developmental and autism screenings; developmental surveillance; psychosocial/behavioral assessments; alcohol and drug use assessment; and the ordering of appropriate laboratory/diagnostic procedures as recommended by the current AAP guidelines.

² Newborn metabolic and hemoglobinopathy screenings should be done according to state law. According to AAP recommendations, Newborn metabolic and hemoglobinopathy screenings should take place between newborn and 2 months of age.

³ Use CPT modifier -52 EPSDT Screening Services/Components Not Completed *plus* CPT code for standard testing method for objective vision/hearing testing, anemia, dyslipidemia, lead and tuberculin testing not completed. If a screening service/component is reported with modifier 52, the provider must complete the screening service/component during the next screening opportunity according to the Periodicity Schedule.

⁴ Use CPT modifier -90 Reference Outside Lab *plus* CPT code when laboratory procedures are performed by a party other than the treating or reporting physician.

⁵ ● indicates referral to a dental home, ★ indicates administer oral health risk assessment. Assess need for fluoride supplementation. Determine whether the patient has a dental home. If the patient does not have a dental home, a referral should be made to one.

⁶ Dental Periodicity Schedule: Per the American Academy of Pediatric Dentistry, the first examination is recommended at the time of the eruption of the first tooth and no later than 12 months of age. Repeat every 6 months or as indicated by the child's risk status/susceptibility to disease.
www.aapd.org/media/Policies_Guidelines/G_Periodicity.pdf

⁷ Initial measurement of hemoglobin or hematocrit is recommended between 9 and 12 months of age.

⁸ All sexually active patients should be screened for sexually transmitted infections (STI). All sexually active girls should have screening for cervical dysplasia as part of a pelvic examination beginning within 3 years of onset of sexual activity or age 21 (which ever comes first).

⁹ Procedure code 99431 and modifier EP are to be used for a newborn screen performed in the hospital, but not on the same day as hospital discharge.

¹⁰ Procedure code 99435 and modifier EP are to be used for a newborn screen performed in the hospital on the same day as hospital discharge.

¹¹ Provide at times noted, unless done previously.

¹² Developmental Surveillance is required for all periods, except when developmental screenings are required.

¹³ All referrals to a dental home must be reported using the YD referral code.
