How to access ePEAP and Register for email notifications

Please see the PA PROMISe™ Provider Internet User Manual for information on how to register for the PROMISe™ Internet Site.

How to access ePEAP (there is no separate registration for ePEAP)

All providers will be defaulted to the option to not receive notification of new bulletins. If a provider wishes to receive notifications, they may sign up through ePEAP.

After you have completed your initial PROMISe™ registration, access the PROMISe™ internet homepage and log-in. The provider Main Page window, the home page for the PROMISe™ internet site, will appear. It provides links to the online provider services, including ePEAP.

The ePEAP link takes you to the ePEAP Menu, shown below.

Note: You are encouraged to use the Help function within ePEAP, when necessary. Click the Help button, located between the ePEAP Menu and Exit buttons, to access this online assistance. Please direct any unresolved questions regarding ePEAP to the Provider Enrollment Unit at 1-800-537-8862.
Manage Bulletins

The Manage Bulletins window is used by providers to choose how they wish to be notified of new bulletins. This window is accessed by clicking the Manage Bulletins link in the ePEAP Menu.
Providers will be defaulted to the option to retrieve bulletins on their own. If they wish to receive notifications from PROMISe, they must choose the ‘By Email’ option, enter a valid email address and click ‘continue’.

Please note: The options shown below will not be available until 9/30/2011.
