

Whereas there are more people with disabilities that need housing in our rural N. Western community than there are openings available and whereas the choice in providers and their ability to satisfy individual interests and choices is very limited and thus uncompetitive;

I, as a family member of an individual with a disability, request that you consider more flexibility in your rules (for example the 30 hour rule) and other licensing rules that limit the ability of new providers to enter the arena with more innovative and possibly more cost effective housing options for my family member.

Yours sincerely,
