The **full-time standard payment rate** is paid for five or more hours of child care per day.

The **part-time standard payment rate** is paid for up to four hours and 59 minutes (not five hours) of child care per day.

The blended rate is paid for child care for children attending school during the school year. It combines days during the school year when the child requires part-time care with days during the school year when the child requires full-time care.

The chart shows blended rates, even though you may not have chosen to accept these rates.

*The Subsidy Weekly Rate is divided by five to determine the CPR.  
The CPR is compared to the MCCA.*

*The Standard Payment Rate will be either the CPR or MCCA, whichever is less.*
