

**Adult Residential Licensing – Personal Care Homes
Fire Evacuation Time/Fire Safe Area Designation
55 Pa.Code § 2600.132(d)**

To Whom it May Concern:

On _____, I inspected _____, located at
(Date) (Name of home)

(Address of home)

Based on that inspection, I have determined that the maximum safe evacuation time for the home, from the time the fire alarm sounds until all residents have evacuated to the outside of the building / fire safe area(s)
(Circle only one)
is _____ minutes and _____ seconds. I have made this determination based on the design and construction of the home.

In addition, I have determined that the home does / does NOT have a fire-safe area(s)*.
(Circle only one)

The fire-safe areas in this home, if any, are:

(DO NOT complete this section if the home does not have fire-safe areas. Describe fire safe areas in detail; the description must include the number of fire-safe areas and the specific location of each fire-safe area. Attach additional pages if necessary and include a diagram if appropriate to positively identify the area(s))

I am qualified to make these determinations because I am not an employee of the home and hold the following credentials **(Circle one or more of the following)**:

- | | |
|--|--|
| 1. Member of a local fire department | 6. Graduate of a county or Commonwealth fire school |
| 2. Fire protection engineer | 7. Volunteer trained and certified by a county or Commonwealth fire school |
| 3. Commonwealth-certified fire protection instructor | 8. Department of Labor and Industry building code inspector |
| 4. College instructor in fire science | 9. Construction code official |
| 5. Insurance company loss control representative | |

Signature: _____ Date: _____

Name: _____

Title: _____

Name and Address of Organization: _____

Telephone Number: _____

This information is valid for one year from the date signed

* Fire safe areas are also referred to as areas of refuge in most fire codes. Under most building codes, a fire safe area usually requires a two-hour separation from other areas of the building, including self closing doors, but this is not specifically required under chapter 2600
