*Note: If a participant is in a nursing facility and has a home outside of the nursing facility, the participant is counted in the county of the nursing facility.

Statewide LTSS Population and HCBS Percentage

Data Period: Feb 2021

*This chart contains CHC, OBRA, Act150 and LIFE program participants.
In February, the statewide percentage of non-duals rose slightly to 8.4%. The percentage of participants in aligned D-SNPs increased from 11.5% to 11.7%, and the percentage of participants in un-aligned D-SNPs increased from 28.7% to 28.9%. The percentage of participants in FFS Medicare decreased by 0.4% to 39.6%. Other Medicare Advantage remained at 10.2%.

Data Period: Feb 2021
D-SNP participants have increased 15.5% since February 2020. The decrease in D-SNP enrollment for December is likely a data anomaly related to timing issues of when OLTL sends enrollment to CMS and when CMS sends D-SNP enrollment back, potentially due to open enrollment in Q4 2020. A mismatch between CMS and OLTL’s IT systems would not count as a D-SNP enrollment for a particular plan. This will continue to be footnoted on future data briefs.
