

PRV720 and PRV435 Files
Effective Date: 04/01/2021

The PRV720 Provider Revalidation File provides valuable information regarding revalidation dates. OMHSAS is working to have this file sent to the Consolidated Consumer Reporting Initiative (CCRI) Counties/Joiners so that you will be able to reach out to your providers and assist them in the revalidation process. We understand that it has been difficult to assist them with this information and many of your providers are missing their deadline forcing the Provider EPOMS PEP to close. We believe this Revalidation file will greatly assist you and your providers in preventing this from happening.

This file is generated on the first of each month and sent from PROMISe through SeGov. We are striving to have the first file sent to you on 7/1/2021 but will keep you advised if there is a change in distribution. In the meantime, we have placed April and May text files on DocuShare which you can use until the PRV720 files can be generated. Please note that the PRV720 file contains *all* providers close to their revalidation deadline and is not specific to CCRI Plan providers.

Attached is the file layout for the PRV720. We have highlighted a field on the file which is important to revalidation monitoring.

We are also working to have the PRV435 sent to you. The file will be supplied to each plan once a week. The file will contain a listing of MA providers/service locations and special indicators. Attached is the file layout and special indicator information. You will note that many indicators apply to EPOMS.

The PRV720 and PRV435 files provide additional information about your providers. They do not replace the PRV416 but supplement the file. If you have any questions about any of the files, please feel free to contact RA-PWOMHSASCCRIDATA@pa.gov. Thank you.
