

Naloxone Take Home Supply - FQHCs/RHCs
Effective Date: 08/23/2021
Date Issued: 04/04/2022

MA Bulletin 08-21-07 announced that effective 08/23/2021, FQHCs and RHCs are to bill procedure code T1015 to receive payment based on their provider-specific PPS payment rate, when providing an encounter that includes providing beneficiaries with a take-home supply of naloxone. In addition, they are to include the appropriate zero-pay HCPCS code from the chart below on a separate claim line so the Department can track the distribution.

Code	Code Description
G2215	Take home supply of nasal naloxone (provision of the services by a Medicare enrolled opioid treatment program), list separately in addition to code for primary procedure
G2216	Take home supply of injectable naloxone (provision of the services by a Medicare-enrolled opioid treatment program), list separately in addition to code for primary procedure

For Encounter Data reporting, the following codes and procedures need to be followed to allow for the zero paid lines:

- The first detail line must include procedure code T1015/HF, T1015/HF/HQ, T1015/HE or T1015/HE/HQ with a Claim Adjustment Reason Code (CARC) of 59 in the CAS segment (which denotes the paid line of a bundled group) with the appropriate paid amount (PPS payment rate).
- The CAS segment of the Non-T1015 line must include a (CARC) of 97 (any line(s) of a bundled group with a paid amount of \$0) and procedure code G2215 or G2216.
- The Non-T1015 detail Line must include a CN1 value of 05.
