

Pennsylvania State Hospital and Restoration Center System: Length of Stay, Demographics, and Diagnoses Report

Pennsylvania Department of Human Services

Office of Mental Health and Substance Abuse Services

January 2020 – December 2020

Table of Contents

Introduction and Purpose	4
End of Month Census by Facility between January 1, 2020 and December 31, 2020	5
Number of Admissions and Discharges per Facility between January 1, 2020 and December 31, 2020	5
Age of Patients in the State Hospital System as of December 31, 2020	6
Race and Gender for Patients in the State Hospital System as of December 31, 2020	6
Race and Gender for Patients Discharged between January 1, 2020 and December 31, 2020	7
Commitment Type of Patients in the State Hospital System as of December 31, 2020, Legal Status Code	7
Commitment Type of Patients in the State Hospital System as of December 31, 2020, Section of the Law	8
Veteran Status of Patients in the State Hospital System as of December 31, 2020	8
Level of Education of Patients in the State Hospital System as of December 31, 2020	9
Marital status of Patients in the State Hospital System as of December 31, 2020	9
Employment Status of Patients in the State Hospital System as of December 31, 2020	10
Length of Stay for Patients Discharged between January 1, 2020 and December 31, 2020	11
Mean and Median Lengths of Stay of Patients in the State Hospital System as of December 31, 2020	12
Distribution of Lengths of Stay of Patients in the State Hospital System as of December 31, 2020, All Levels of Care	12
Distribution of Lengths of Stay of Patients in the State Hospital System as of December 31, 2020, Forensic Care	13
Distribution of Lengths of Stay of Patients in the State Hospital System as of December 31, 2020, Psychiatric Care	14
Distribution of Lengths of Stay of Patients in the State Hospital System as of December 31, 2020, Long Term Care	15
Distribution of Lengths of Stay of Patients in the State Hospital System as of December 31, 2020, Sexual Responsibility and Treatment Program	16
County of Origin for New Patients	17
County of Origin for New Patients between January 1, 2020 and December 31, 2020, All Levels of Care, Raw Counts and Proportions	18

County of Origin for New Patients between January 1, 2020 and December 31, 2020, Psychiatric Care, Raw Counts and Proportions 21

County of Origin for New Patients between January 1, 2020 and December 31, 2020, Forensic Care, Raw Counts and Proportions 23

County of Origin for New Patients between January 1, 2020 and December 31, 2020, Sexual Responsibility and Treatment Program, Raw Counts and Proportions 26

Census by Diagnoses..... 27

 Number of Patients by Mental Health Diagnosis in the State Hospital System as of December 31, 2020 27

 Number of Patients by Physical Health Diagnosis in the State Hospital System as of December 31, 2020 28

 Number of Patients with a Substance Use Disorder by Substance in the State Hospital System as of December 31, 2020..... 29

Appendix..... 30

 Methodology..... 30

Introduction and Purpose

This report is created and prepared by the Pennsylvania Office of Mental Health and Substance Abuse Services (OMHSAS). The information contained within this report is extracted from the Patient Tracking System (PTS) of the State Facility Tracking System. The medical records staff at each of the six state hospitals and one restoration center are continually updating PTS with the necessary information of any individual served.

The purpose of this report is to provide the reader with an overview of lengths of stay, demographics, and diagnosis information, as it exists on the last day of the month for each of the state hospitals. This report is a limited data set designed for the purposes of research, public health, or health care operations in accordance with 45 C.F.R. § 164.502.

Counts of individuals that are less than 11 individuals include the designation of “<11” to protect the confidentiality of individuals in accordance with the Department’s data governance policies.

Each table, chart, and graph are labeled regarding the content contained within the visualization. For definitions of terminology and data used, please refer to the appendix.

End of Month Census by Facility between January 1, 2020 and December 31, 2020

This table provides the number of patients discharged during the past year whose length of stay in the state hospital system is less than a specified length of time. Counts are separated by facility and level of care.

This table is also available separated by mental health diagnosis later in this document.

The plots in this section detail the distribution of lengths of stay at each state hospital and are separated by level of care. This section also contains plots that detail the average length of stay for each state hospital.

Mean and Median Lengths of Stay of Patients in the State Hospital System as of December 31, 2020

Measure	Psychiatric						Forensic		Long Term	S RTP
	CLA	DAN	NOR	TOR	WAR	WER	NOR	TOR	SOU	TOR
Mean	7.54	4.21	4.4	4.84	4.45	4.82	1.97	1.39	5.35	8.54
Median	3.75	1.49	1.46	1.9	1.97	2.57	0.9	0.31	4.95	8.49

This table displays the mean and median lengths of stay, separated by state hospital and level of care by number of years.

Distribution of Lengths of Stay of Patients in the State Hospital System as of December 31, 2020, All Levels of Care

This plot displays the distribution of lengths of stay for patients in all levels of care using a boxplot. Please note that any values above 22.9 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

The lower and upper ends of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median. For example, the median for CLA on this plot is approximately 3.745 years, the first quartile is 1.658 years, and the third quartile is 11.438 years. On a box plot, 25% of the data fits between

each quartile. Therefore, for CLA on this plot, 25% of the lengths of stay at CLA are below 1.658 years, 25% of lengths of stay are between 1.658 years and 3.745 years, 25% are between 3.745 years and 11.438 years, and 25% are above 11.438 years.

Distribution of Lengths of Stay of Patients in the State Hospital System as of December 31, 2020, Forensic Care

This plot displays the distribution of lengths of stay for patients in forensic care using a boxplot. The lower and upper ends of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 3.7 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

Distribution of Lengths of Stay of Patients in the State Hospital System as of December 31, 2020, Psychiatric Care

This plot displays the distribution of lengths of stay for patients in psychiatric care using a boxplot. The lower and upper ends of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 22.9 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

Distribution of Lengths of Stay of Patients in the State Hospital System as of December 31, 2020, Long Term Care

This plot displays the distribution of lengths of stay for patients in long term care using a boxplot. The lower and upper ends of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 15.6 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

Distribution of Lengths of Stay of Patients in the State Hospital System as of December 31, 2020, Sexual Responsibility and Treatment Program

This plot displays the distribution of lengths of stay for patients in the sexual responsibility and treatment program using a boxplot. The lower and upper ends of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 24.7 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

County of Origin for New Patients

This section breaks down the new patients to the state hospital system by county of origin and provides the raw counts of patients admitted from each county, and that county's total population. Additionally, these charts display the percent of all new patients that were admitted from each county, and the percent of the PA state population that resides within that county.

The "Significance Level" column displays the level of statistical significance of the difference between the "Percent of Total Patients Admitted" and the "County's Proportion of State Population." For more information, see the "Methodology" section of the appendix.

High statistical significance indicates that there is a significant difference between the proportion of patients in PA state hospitals that originate from a given county and that county's proportion of the state population. If each county committed the same number of patients to the state hospitals after adjusting for differences in population between counties, then the difference between these proportions should not be statistically significant.

If a county did not commit any patients to the state hospital system during the year, then that county will not be displayed in the table. Their population will still be taken into account when calculating population proportions.

County of Origin for New Patients between January 1, 2020 and December 31, 2020, All Levels of Care, Raw Counts and Proportions

County	Total Population	County's Proportion of State Population	Number of Patients	Percent of Total Patients Admitted	Significance Level

County of Origin for New Patients between January 1, 2020 and December 31, 2020, Sexual Responsibility and Treatment Program, Raw Counts and Proportions

There were no SRTP admissions in 2020.

Census by Diagnoses

The following tables detail the census for each state hospital, separated by level of care, for patients who have a specific category of diagnosis. Please note that patients may have multiple diagnoses and may therefore be represented on each table more than once.

Number of Patients by Mental Health Diagnosis in the State Hospital System as of December 31, 2020

Diagnosis	Psychiatric							Forensic			Long Term	S RTP	System
	CLA	DAN	NOR	TOR	WAR	WER	Total	NOR	TOR	Total	SOU	TOR	Total

Tobacco	33	<11	<11	29	30	38	140	<11	<11	<11	<11	<11	154

This table is a census of all patients diagnosed with a substance use disorder in the state hospital system taken on December 31, 2020, separated by facility, level of care, and substance.

Appendix

Glossary of Terms

- Level of Care
 - PS: Psychiatric Care
 - FO: Forensic Care
 - LT: Long Term Care
 - SRTP: Sexual Responsibility and Treatment Program (Act 21 Program)
- State Hospital Abbreviations/Facility Codes
 - CLA: Clarks Summit State Hospital
 - DAN: Danville State Hospital
 - NOR: Norristown State Hospital
 - SOU: South Mountain Restoration Center
 - TOR: Torrance State Hospital
 - WAR: Warren State Hospital
 - WER: Wernersville State Hospital

Data Sets

- Patient Tracking System (PTS)
 - The extraction date of the data for this report is Feb 16, 2021.
 - Pennsylvania Department of Human Services, State Facility Tracking System. (2021). *Patient Tracking System* [XLSX file] Harrisburg, PA.
 - The variables used in this data set are listed below with their definitions.
- Pennsylvania County Population Data
 - These data are pulled from the U.S. Census Bureau’s American Community Survey.
 - United States Census Bureau, Population Division. (June 2019). *U.S. Census Bureau, American Community Survey 1-Year Estimates* [CSV file]. Retrieved from <https://data.census.gov/cedsci/table?q=pennsylvania%20population&g=040000US42.050000&tid=ACS1Y2019.B01003&hidePreview=true>
 - This data set provides population estimates for each year from 2010 through 2020.

Methodology

- Null/Missing County Data
 - 19.53% of the records in the PTS data set contain missing county data.
 - Within the PTS data set, the Base Service Unit (BSU) is also recorded. The BSU is defined as “...an organizational unit consisting of multidisciplinary

professional and nonprofessional staff capable of planning, directing and coordinating appropriate services for individuals with an intellectual disability and in need of service from the county program” (055 PA Code § 6201.12).

- For each record with missing county data, the county corresponding to that patient’s BSU of record will be used instead. This leaves only 0% of the records with missing county data.
- Population Estimates
 - The U.S. Census Bureau tends to release new population estimates each June for the previous year. Therefore, all calculations in this report that require population counts will be conducted using population counts from the previous year.
 - Populations for each area tend to have little variation in the span of a single year, so the estimates from the previous year will be considered an analogous and valid alternative.
- County of Origin for New Patients
 - The significance level is based on the *p-value* produced by a Pearson’s Chi-squared test of two proportions with Yates’ continuity correction applied where possible.
 - A smaller *p-value* indicates greater statistical significance. Any value above 0.05 is considered not statistically significant.
 - Note that if the number of total patients statewide for a given category is low, significance level may be inaccurate, as small sample sizes have fewer degrees of freedom (This may be partially corrected via Yates). This is most likely to occur in long term care and SRTP (Act-21) care.
 - Yates’ continuity correction is applied to cases with small sample sizes, and may increase the *p-value* produced by the test. Please note that Yates has a tendency to over-correct, increasing the risk of type II error.
 - It should be noted that patients listed as “Out of State” will have zero percent of the state population. Therefore, it is likely that a single patient may cause the *p-value* for “Out of State” patients to be significant.
