SUBJECT
Prior Authorization of Lipotropics, Other – Pharmacy Services

BY
Sally A. Kozak, Deputy Secretary
Office of Medical Assistance Programs

IMPORTANT REMINDER: All providers must revalidate the Medical Assistance (MA) enrollment of each service location every 5 years. Providers should log into PROMISe to check the revalidation dates of each service location and submit revalidation applications at least 60 days prior to the revalidation dates. Enrollment (revalidation) applications may be found at: https://www.dhs.pa.gov/providers/Providers/Pages/PROMISe-Enrollment.aspx.

PURPOSE:
The purpose of this bulletin is to issue updated handbook pages that include the requirements for prior authorization and the type of information needed to evaluate the medical necessity of prescriptions for Lipotropics, Other submitted for prior authorization.

SCOPE:
This bulletin applies to all licensed pharmacies and prescribers enrolled in the Medical Assistance (MA) Program. The guidelines to determine the medical necessity of Lipotropics, Other will be utilized in the fee-for-service delivery system and by the MA managed care organizations (MCOs) in Physical Health HealthChoices and Community HealthChoices. Providers rendering services in the MA managed care delivery system should address any questions related to the prior authorization of Lipotropics, Other to the appropriate MCO.

COMMENTS AND QUESTIONS REGARDING THIS BULLETIN SHOULD BE DIRECTED TO:
The appropriate toll-free number for your provider type.

Visit the Office of Medical Assistance Programs website at https://www.dhs.pa.gov/providers/Providers/Pages/Health%20Care%20for%20Providers/Contact-Information-for-Providers.aspx.
The Department of Human Services’ (Department) Pharmacy and Therapeutics (P&T) Committee reviews published peer-reviewed medical literature and recommends the following:

- Preferred or non-preferred status for new drugs in therapeutic classes already included in the Preferred Drug List (PDL);
- Changes in the status of drugs on the PDL from preferred to non-preferred and non-preferred to preferred;
- New quantity limits;
- Classes of drugs to be added to or deleted from the PDL; and
- New guidelines or revisions to existing guidelines to evaluate the medical necessity of prescriptions submitted for prior authorization.

**DISCUSSION:**

During the September 15, 2021, meeting, the P&T Committee recommended the following revisions to the guidelines to determine medical necessity of Lipotropics, Other:

- Addition of a requirement for prior authorization and medical necessity guidelines for Evkeeza (evinacumab), an angiopoietin-like 3 (ANGPTL3) inhibitor recently approved by the U.S. Food and Drug Administration for the treatment of homozygous familial hypercholesterolemia in people 12 years of age and older;
- Revision of the explanation of therapeutic failure of a Lipotropic, Other;
- Removal of the guidelines regarding documentation of goal low density lipoprotein cholesterol;
- Removal of the guidelines that proprotein convertase subtilisin/kexin 9 (PCSK9) inhibitors be prescribed by or in consultation with a specialist;
- Removal of the guidelines regarding concomitant use of a PCSK9 inhibitor, an ACL inhibitor, and Juxtapid (lomitapide);
- Revision of the guideline regarding concomitant use of a PCSK9 inhibitor with another PCSK9 inhibitor;
- Revision of the guidelines regarding concomitant use of an ACL inhibitor with simvastatin or pravastatin; and
- Addition of a guideline to the requests for renewal of the prior authorization section that for a non-preferred Lipotropic, Other the beneficiary has a history of therapeutic failure of or a contraindication or an intolerance to the preferred Lipotropics, Other approved or medically accepted for the treatment of the beneficiary’s diagnosis.

The revisions to the guidelines to determine medical necessity of prescriptions for Lipotropics, Other submitted for prior authorization, as recommended by the P&T Committee, were subject to public review and comment and subsequently approved for implementation by the Department.

**PROCEDURE:**
The procedures for prescribers to request prior authorization of Lipotropics, Other are located in SECTION I of the Prior Authorization of Pharmaceutical Services Handbook. The Department will take into account the elements specified in the clinical review guidelines (which are included in the provider handbook pages in the SECTION II chapter related to Lipotropics, Other) when reviewing the prior authorization request to determine medical necessity.

As set forth in 55 Pa. Code § 1101.67(a), the procedures described in the handbook pages must be followed to ensure appropriate and timely processing of prior authorization requests for drugs that require prior authorization.

Prior Authorization of Pharmaceutical Services Handbook – SECTION II
Pharmacy Prior Authorization Guidelines
[https://www.dhs.pa.gov/providers/Pharmacy-Services/Pages/Clinical-Guidelines.aspx](https://www.dhs.pa.gov/providers/Pharmacy-Services/Pages/Clinical-Guidelines.aspx)
I. Requirements for Prior Authorization of Lipotropics, Other

A. Prescriptions That Require Prior Authorization

Prescriptions for Lipotropics, Other that meet any of the following conditions must be prior authorized:

1. A non-preferred Lipotropic, Other. See the Preferred Drug List (PDL) for the list of preferred Lipotropics, Other at: https://papdl.com/preferred-drug-list.

2. A Lipotropic, Other with a prescribed quantity that exceeds the quantity limit. The list of drugs that are subject to quantity limits, with accompanying quantity limits, is available at: https://www.dhs.pa.gov/providers/Pharmacy-Services/Pages/Quantity-Limits-and-Daily-Dose-Limits.aspx.

3. A proprotein convertase subtilisin/kexin type 9 (PCSK9) inhibitor (e.g., Praluent [alirocumab], Repatha [evolocumab]).

4. An adenosine triphosphate-citrate lyase (ACL) inhibitor (e.g., Nexletol [bempedoic acid], Nexlizet [bempedoic acid/ezetimibe]).

5. A microsomal triglyceride transfer protein (MTP) inhibitor (e.g., Juxtapid [lomitapide]).

6. An angiopoietin-like 3 (ANGPTL3) inhibitor (e.g., Evkeeza [evinacumab]).

B. Review of Documentation for Medical Necessity

In evaluating a request for prior authorization of a prescription for a Lipotropic, Other, the determination of whether the requested prescription is medically necessary will take into account whether the beneficiary:

1. Is prescribed the requested Lipotropic, Other for the treatment of a diagnosis that is indicated in the U.S. Food and Drug Administration (FDA)-approved package labeling OR a medically accepted indication; **AND**

2. Is prescribed a dose that is consistent with FDA-approved package labeling, nationally recognized compendia, or peer-reviewed medical literature; **AND**

3. Is age-appropriate according to FDA-approved package labeling, nationally recognized compendia, or peer-reviewed medical literature; **AND**

4. Does not have a contraindication to the prescribed medication; **AND**

5. For treatment of a lipid disorder, has documentation of results of a lipid profile within 3 months prior to the request for the Lipotropic, Other; **AND**

January 3, 2022
(Replacing January 5, 2021)
6. For a PCSK9 inhibitor, **all** of the following:

   a. Has at least **one** of the following:
      
      i. A history of clinical atherosclerotic cardiovascular disease (ASCVD)\(^1\) (i.e., secondary prevention)
      
      ii. **One** of the following (i.e., primary prevention):
         
         a) A diagnosis of familial hypercholesterolemia in accordance with current consensus guidelines\(^2\)
         
         b) A diagnosis of other severe primary hypercholesterolemia (baseline [before treatment with any lipid-lowering agent] LDL-C \(\geq\) 190 mg/dL),

   b. Has a history of **one** of the following:

   i. Therapeutic failure\(^3\) while adherent to treatment with the maximally tolerated doses of 2 different high-intensity statins for \(\geq\) 3 consecutive months each,

   ii. **Both** of the following:

      a) A temporally related intolerance\(^4\) to 2 high-intensity statins that occurred after **both** of the following:

         (i) Modifiable comorbid conditions that may enhance statin intolerance were ruled out and/or addressed by the prescriber as clinically indicated (e.g., hypothyroidism, vitamin D deficiency)

         (ii) All possible drug interactions with statins were addressed by **all** of the following (if clinically appropriate):

            a. Dose decrease of the interacting non-statin drug,
            b. Discontinuation of the interacting non-statin drug,
            c. Change to an alternative statin that has a lower incidence of drug interactions

      b) **One** of the following:

\(^{1}\) Clinical ASCVD consists of acute coronary syndromes, history of myocardial infarction, stable or unstable angina or coronary or other arterial revascularization, stroke, transient ischemic attack, or peripheral artery disease including aortic aneurysm, all of atherosclerotic origin. (American Heart Association 2018 Cholesterol Clinical Practice Guidelines)

\(^{2}\) e.g., American Heart Association, International Familial Hypercholesterolaemia Foundation, European Atherosclerosis Society, International Atherosclerosis Society

\(^{3}\) Therapeutic failure of a Lipotropic, Other is defined as failure to achieve LDL-C goal or percentage reduction of LDL-C for cardiovascular risk that is consistent with current consensus guidelines (e.g., AHA/ACC, AACE/ACE, etc).

\(^{4}\) Temporally related intolerance of a statin is defined as the occurrence of symptoms and/or lab abnormalities upon initiation of a statin, resolution of symptoms and/or lab abnormalities upon discontinuation of a statin, and recurrence of symptoms and/or lab abnormalities after rechallenge with the same statin at the same dose.
MEDICAL ASSISTANCE HANDBOOK
PRIOR AUTHORIZATION OF PHARMACEUTICAL SERVICES

(i) Therapeutic failure while adherent to treatment for ≥3 consecutive months with the lowest FDA-approved daily dose or alternate-day dosing of any statin
(ii) A temporally related intolerance to the lowest FDA-approved daily dose or alternate-day dosing of any statin,

iii. A contraindication to statins,

c. Has a history of one of the following:

i. Therapeutic failure while adherent to treatment with ezetimibe in combination with the maximally tolerated dose of the highest-tolerated intensity statin (if clinically appropriate) for ≥3 consecutive months
ii. A contraindication or an intolerance to ezetimibe,

d. Is prescribed the requested PCSK9 inhibitor in addition to one of the following:

i. For treatment of homozygous familial hypercholesterolemia (HoFH), standard lipid-lowering treatments as recommended by current consensus guidelines
ii. For treatment of all other conditions, the maximally tolerated dose of the highest-tolerated intensity statin (if clinically appropriate),

e. If currently using a different PCSK9 inhibitor, will discontinue use of that PCSK9 inhibitor prior to starting the requested PCSK9 inhibitor,

f. For a non-preferred PCSK9 inhibitor, has a documented history of therapeutic failure of or a contraindication or an intolerance to the preferred PCSK9 inhibitor(s) approved or medically accepted for the beneficiary’s diagnosis;

AND

7. For an ACL inhibitor, all of the following:

a. Is prescribed the ACL inhibitor by or in consultation with an appropriate specialist (e.g., cardiologist, endocrinologist, or other provider specializing in lipid disorders),

b. Has at least one of the following:

i. A history of clinical ASCVD
ii. A diagnosis of familial hypercholesterolemia in accordance with current consensus guidelines,

5 e.g., American Heart Association/American College of Cardiology, American Association of Clinical Endocrinologists/American College of Endocrinology, American Diabetes Association, National Lipid Association, European Society of Cardiology/European Atherosclerosis Society, International Familial Hypercholesterolaemia Foundation, International Atherosclerosis Society

6 Clinical ASCVD consists of acute coronary syndromes, history of myocardial infarction, stable or unstable angina or coronary or other arterial revascularization, stroke, transient ischemic attack, or peripheral artery disease including aortic aneurysm, all of atherosclerotic origin. (American Heart Association 2018 Cholesterol Clinical Practice Guidelines)
c. Has a history of **one** of the following:
   
i. Therapeutic failure⁸ while adherent to treatment with the maximally tolerated doses of 2 different high-intensity statins for ≥3 consecutive months each,
   
ii. **Both** of the following:
   
   a) A temporally related intolerance⁹ to 2 high-intensity statins that occurred after **both** of the following:
      
      (i) Modifiable comorbid conditions that may enhance statin intolerance were ruled out and/or addressed by the prescriber as clinically indicated (e.g., hypothyroidism, vitamin D deficiency)
      
      (ii) All possible drug interactions with statins were addressed by **all** of the following (if clinically appropriate):
         
         a. Dose decrease of the interacting non-statin drug,
         b. Discontinuation of the interacting non-statin drug,
         c. Change to an alternative statin that has a lower incidence of drug interactions
   
   b) **One** of the following:
      
      (i) Therapeutic failure while adherent to treatment for ≥3 consecutive months with the lowest FDA-approved daily dose or alternate-day dosing of any statin
      
      (ii) A temporally related intolerance to the lowest FDA-approved daily dose or alternate-day dosing of any statin,
   
   iii. A contraindication to statins,

   d. Has a history of **both** of the following:
      
   i. **One** of the following:
      
      a) Therapeutic failure while adherent to treatment with ezetimibe in combination with the maximally tolerated dose of the highest-tolerated intensity statin (if clinically appropriate) for ≥3 consecutive months
      
      b) A contraindication or an intolerance to ezetimibe

---

⁷ e.g., American Heart Association, International Familial Hypercholesterolaemia Foundation, European Atherosclerosis Society, International Atherosclerosis Society

⁸ Therapeutic failure of a Lipotropic, Other is defined as failure to achieve LDL-C goal or percentage reduction of LDL-C for cardiovascular risk that is consistent with current consensus guidelines (e.g., AHA/ACC, AACE/ACE, etc).

⁹ Temporally related intolerance of a statin is defined as the occurrence of symptoms and/or lab abnormalities upon initiation of a statin, resolution of symptoms and/or lab abnormalities upon discontinuation of a statin, and recurrence of symptoms and/or lab abnormalities after rechallenge with the same statin at the same dose.
ii. **One** of the following:

   a) Therapeutic failure while adherent to treatment with a PCSK9 inhibitor  
   b) A contraindication or intolerance to PCSK9 inhibitors,

e. Is prescribed the requested ACL inhibitor in addition to the maximally tolerated dose of the highest-tolerated intensity statin (if clinically appropriate),

f. If currently taking simvastatin or pravastatin, will not be using the requested ACL inhibitor concomitantly with simvastatin at a dose of greater than 20 mg daily or pravastatin at a dose of greater than 40 mg daily;

**AND**

8. For an MTP inhibitor, **all** of the following:

a. Is prescribed the MTP inhibitor by or in consultation with a cardiologist, endocrinologist, or other provider specializing in lipid disorders,

b. For treatment of HoFH, has a diagnosis of HoFH in accordance with current consensus guidelines,\(^{10}\)

c. **One** of the following:

   i. Has a history of therapeutic failure of or a contraindication or an intolerance to PCSK9 inhibitors  
   ii. Is homozygous for LDL receptor (LDLR)-negative mutations (i.e., has LDLR-negative mutations in both alleles) associated with LDLR activity below 2%,

d. Is prescribed the MTP inhibitor in addition to standard lipid-lowering treatments as recommended by current consensus guidelines;\(^{11}\)

**AND**

9. For an ANGPTL3 inhibitor, **all** of the following:

a. Is prescribed the ANGPTL3 inhibitor by or in consultation with a cardiologist, endocrinologist, or other provider specializing in lipid disorders,

\(^{10}\) e.g., American Heart Association, International Familial Hypercholesterolaemia Foundation, European Atherosclerosis Society, International Atherosclerosis Society  
\(^{11}\) e.g., American Heart Association/American College of Cardiology, American Association of Clinical Endocrinologists/American College of Endocrinology, American Diabetes Association, National Lipid Association, European Society of Cardiology/European Atherosclerosis Society, International Familial Hypercholesterolaemia Foundation, International Atherosclerosis Society
b. For treatment of HoFH, has a diagnosis of HoFH in accordance with current consensus guidelines,\textsuperscript{12}

c. \textbf{One} of the following:

i. Has a history of therapeutic failure of or a contraindication or an intolerance to PCSK9 inhibitors

ii. Is homozygous for LDLR-negative mutations (i.e., has LDLR-negative mutations in both alleles) associated with LDLR activity below 2%,

d. Is prescribed the ANGPTL3 inhibitor in addition to standard lipid-lowering treatments as recommended by current consensus guidelines;\textsuperscript{13}

\textbf{AND}

10. For all other non-preferred Lipotropics, Other, has a history of therapeutic failure of or a contraindication or intolerance to the preferred Lipotropics, Other approved or medically accepted for the beneficiary’s diagnosis; \textbf{AND}

11. If a prescription for a Lipotropic, Other is in a quantity that exceeds the quantity limit, the determination of whether the prescription is medically necessary will also take into account the guidelines set forth in the Quantity Limits Chapter.

\textbf{NOTE:} If the beneficiary does not meet the clinical review guidelines but, in the professional judgment of the physician reviewer, the services are medically necessary to meet the medical needs of the beneficiary, the request for prior authorization will be approved.

\textbf{FOR RENEWALS OF PRIOR AUTHORIZATION FOR LIPOTROPICS, OTHER:} The determination of medical necessity of a request for renewal of a prior authorization for a Lipotropic, Other that was previously approved will take into account whether the beneficiary:

1. Has documentation of tolerability and a positive clinical response demonstrated by lab test results, if appropriate for the diagnosis, since starting the requested medication (e.g., decreased LDL-C, decreased triglycerides, etc.); \textbf{AND}

2. Is prescribed a dose that is consistent with FDA-approved package labeling, nationally recognized compendia, or peer-reviewed medical literature; \textbf{AND}

3. Does not have a contraindication to the prescribed medication; \textbf{AND}

\textsuperscript{12} e.g., American Heart Association, International Familial Hypercholesterolaemia Foundation, European Atherosclerosis Society, International Atherosclerosis Society

\textsuperscript{13} e.g., American Heart Association/American College of Cardiology, American Association of Clinical Endocrinologists/American College of Endocrinology, American Diabetes Association, National Lipid Association, European Society of Cardiology/European Atherosclerosis Society, International Familial Hypercholesterolaemia Foundation, International Atherosclerosis Society
4. For a PCSK9 inhibitor, is using the requested PCSK9 inhibitor in addition to one of the following:

   a. For treatment of HoFH, standard lipid-lowering treatments as recommended by current consensus guidelines\(^\text{14}\)
   b. For treatment of all other conditions, the maximally tolerated dose of the highest-tolerated intensity statin (if clinically appropriate);

**AND**

5. For an ACL inhibitor, all of the following:

   a. Is prescribed the ACL inhibitor by or in consultation with an appropriate specialist (e.g., cardiologist, endocrinologist, or other provider specializing in lipid disorders),
   b. Is using the requested ACL inhibitor in addition to the maximally tolerated dose of the highest-tolerated intensity statin (if clinically appropriate),
   c. If currently taking simvastatin or pravastatin, is not using the requested ACL inhibitor concomitantly with simvastatin at a dose of greater than 20 mg daily or pravastatin at a dose of greater than 40 mg daily;

**AND**

6. For an MTP inhibitor, both of the following:

   a. Is prescribed the MTP inhibitor by or in consultation with a cardiologist, endocrinologist, or other provider specializing in lipid disorders
   b. Is using the MTP inhibitor in addition to standard lipid-lowering treatments as recommended by current consensus guidelines\(^\text{15}\)

**AND**

7. For an ANGPTL3 inhibitor, both of the following:

   a. Is prescribed the ANGPTL3 inhibitor by or in consultation with a cardiologist, endocrinologist, or other provider specializing in lipid disorders
   b. Is using the ANGPTL3 inhibitor in addition to standard lipid-lowering treatments as recommended by current consensus guidelines\(^\text{16}\)

\(^{14}\) e.g., American Heart Association/American College of Cardiology, American Association of Clinical Endocrinologists/American College of Endocrinology, American Diabetes Association, National Lipid Association, European Society of Cardiology/European Atherosclerosis Society, International Familial Hypercholesterolaemia Foundation, International Atherosclerosis Society

\(^{15}\) e.g., American Heart Association/American College of Cardiology, American Association of Clinical Endocrinologists/American College of Endocrinology, American Diabetes Association, National Lipid Association, European Society of Cardiology/European Atherosclerosis Society, International Familial Hypercholesterolaemia Foundation, International Atherosclerosis Society

\(^{16}\) e.g., American Heart Association/American College of Cardiology, American Association of Clinical Endocrinologists/American College of Endocrinology, American Diabetes Association, National Lipid Association, European Society of Cardiology/European Atherosclerosis Society, International Familial Hypercholesterolaemia Foundation, International Atherosclerosis Society
AND

8. For all other non-preferred Lipotropics, Other, has a history of therapeutic failure of or a contraindication or an intolerance to the preferred Lipotropics, Other approved or medically accepted for the beneficiary’s diagnosis; AND

9. If a prescription for a Lipotropic, Other is in a quantity that exceeds the quantity limit, the determination of whether the prescription is medically necessary will also take into account the guidelines set forth in the Quantity Limits Chapter.

NOTE: If the beneficiary does not meet the clinical review guidelines listed above but, in the professional judgment of the physician reviewer, the services are medically necessary to meet the medical needs of the beneficiary, the request for prior authorization will be approved.

C. Clinical Review Process

Prior authorization personnel will review the request for prior authorization and apply the clinical guidelines in Section B. above to assess the medical necessity of a prescription for a Lipotropic, Other. If the guidelines in Section B. are met, the reviewer will prior authorize the prescription. If the guidelines are not met, the prior authorization request will be referred to a physician reviewer for a medical necessity determination. Such a request for prior authorization will be approved when, in the professional judgment of the physician reviewer, the services are medically necessary to meet the medical needs of the beneficiary.

D. Dose and Duration of Therapy

Requests for prior authorization of Lipotropics, Other will be approved as follows:

1. For a PCSK9 inhibitor:
   a. Initial requests will be approved for up to 3 months.
   b. Renewal requests will be approved for up to 12 months.

2. For an ACL inhibitor:
   a. Initial requests will be approved for up to 3 months.
   b. Renewal requests will be approved for up to 12 months.

3. For all other Lipotropics, Other:
   a. Initial requests will be approved for up to 6 months.
   b. Renewal requests will be approved for up to 12 months.
