Next Steps from HAP's HIE Analysis

Sari Siegel, PhD
Vice President, Health Care Research
The Hospital and Healthsystem Association of Pennsylvania
HAP hired IMPAQ, a DC-based research consulting firm, to recommend strategies for how HAP can support member hospitals that participate in P3N.

**Approach:** IMPAQ conducted

- Interviews with member hospitals to understand factors driving their decision to participate in the P3N
- Interviews with 5 other state hospital associations to assess their strategies to support members
- Interviews with all 5 Pennsylvania HIOs
- Survey of HAP members assessing their experience
43% of PA hospitals do not participate in P3N

Non-participating hospitals statistically are more likely to be

- Psych, LTAC, and rehabilitation hospitals
- Small (fewer than 100 beds)
- Non-teaching
- Case mix: disproportionate Medicare (lower commercial reimbursement)
Top reason for participation: Clinical decision making (followed by care coordination, public reporting, and population health surveillance)

Top reasons for not participating
- EHRs meet data exchange needs
- Most of their patients seek all care within the system, reducing need to exchange info outside of system
- Concern over incompatible IT infrastructure and related costs
- Perception that data availability through P3N is limited
HIO and P3N Satisfaction Rates:

- 77% of participating respondents rated their experience with their HIO positively
- 53% of participating respondents rated their experience with P3N positively

Note: Most survey respondents have been participating in P3N for 3+ years
Some HIOs offer only CCD and ADT alerts for ED admissions, while others offer:

- ADT alerts for inpatient admission and discharge
- Encounter summaries
- Direct secure messaging

Structure of data sharing varies

- Some HIOs provide discrete fields that push to hospital EHRs; other HIOs require a separate portal to exchange data

Many participating providers fail to contribute all requested data
Onboarding grants through ARRA, HITECH have been extremely helpful in PA and other states.

Found association between participation in P3N and Medicare VBP model; interviewees widely noted that the connection between quality and financial performance drives HIE participation.

Some states mandate HIE participation.
HAP is adopting IMPAQ’s recommendation that we develop a CIO/CMIO Council with a working group comprised of IT executives at member hospitals.

Will begin recruitment to Council this month; first session of working group slated for October.

Working group agenda to include strategies to better partner with P3N, HI Os, and EHR vendors to meet needs of Pennsylvania hospitals and health systems.

VISION

Electronic health information exchange (eHIE) enables initiatives striving to improve patient experience, population health and healthcare cost.

MISSION

To establish a statewide interoperable system for participating organizations to electronically move health information in a manner that ensures the secure and authorized exchange of health information to provide and improve care to patients.
• Engage all providers in robust health information exchange.

• Increase the speed and accuracy of diagnosis for individuals and populations.

• Alert providers/care teams to an admission of patient.

• Reduce readmissions and redundant tests by sharing patient information and care plans with other providers and payers who care for the same patients.

• Increase patient satisfaction by reducing their time spent in the healthcare system and eliminating frustrating duplication.
1. Improve upon our existing services by leveraging other state services and resources

2. Expand the coverage area of providers exchanging data

3. Increase bi-directional access to public health reporting registries

4. Provide improved analytics to better support performance measurement and quality reporting

5. Enhance the types of patient data exchanged

6. Update the certification program to better serve all current and new participants

7. Offer expanded system access to patients and providers

8. Expand exchange capabilities to include external state and federal partners
1. Leverage state services and resources

Fiscal Year 2019-2020 Accomplishments:
• PA eHealth supported production connections to four Department of Health public health registries and one Department of Human Services (DHS) registry.
• PA eHealth onboarded 3 HIOs to the Prescription Drug Monitoring Program (PDMP) through the Public Health Gateway (PHG) and Lancaster General Health began using RxCheck PDMP gateway.
• PA eHealth continued work with IBM in developing a robust provider directory leveraging data from DHS, Department of Health (DOH), Department of Aging (PDA), Department of Drug and Alcohol Programs (DDAP), Department of State (DOS) and the Centers for Medicare and Medicaid Services (CMS).

Current Activity:
• Working to provide Medicaid claims data to HIOs.
• Onboarding additional member organizations to PDMP through PHG.
• The new Pennsylvania Patient and Provider Network (P3N) system will integrate into the Medicaid Management Information System (MMIS).
2. Expand coverage area of exchange

Fiscal Year 2019-2020 Accomplishments:
• In September 2019, PA eHealth completed onboarding the Pennsylvania Department of Corrections’ (DOC) electronic health record (EHR) system, which covers all 25 state correctional institutions, to the P3N.
• DHS awarded $4.45 million in HIE Onboarding Grants to connect 62 inpatient (including 52 nursing homes) and 53 ambulatory providers to P3N Certified HIOs.

Current Activity:
• Working with DOC to provide clinical information to the P3N when inmates are receiving medical services in the community.
• Internal Advance Planning Document (IAPD) for FFY 2021 includes up to $7.75 million in HIE Onboarding Grants.
• The FFY 2021 HIT IAPD also includes up to $500,000 in MA Health Plan Onboarding/Interoperability Grants.
Fiscal Year 2019-2020 Accomplishments:

- DHS awarded $65,000 to HIOs to support their efforts to connect their member organizations (MOs) to public health registries through PHG.
- In the last week of June 2020, DOH processed more than 50,000 PA-SiIS messages through the PHG and more than 140,000 total DOH PHG messages were processed that week.
- All five P3N Certified HIOs achieved production status with one or more PHG registries and all five have production connections to the Electronic Lab Registry (eLR).
- Thirty HIO MOs are reporting the results of COVID-19 tests to eLR through the PHG.
- PA eHealth also provided funding to DOH to support ongoing development of the PHG and registries, including Electronic Case Reporting (eCR).

Current Activity:

- Will offer eCR onboarding grants in FFY 2021.
Fiscal Year 2019-2020 Accomplishments:
• Worked with the National Center for Quality Assurance and P3N HIOs to explore certification strategies to leverage their clinical data repositories for payer members’ clinical quality measure analytics to replace or supplement paper chart reviews.
• Provided all HIO demographic data fill-rate reports to HIOs on a monthly basis and provided a weekly report to each HIO that identifies individual patient registrations with missing demographic information.
• Patient matching or linking has steadily increased from 21.6% in June 2019 to 30.5% in June 2020.

Current Activity:
• Plan to offer Patient Matching Improvement Grants to HIOs in FFY 2021 to improve patient matching within HIOs and across the P3N.
• Working with IBM to include patient Medicaid ID within patient demographics to improve matching.
5. Enhance the types of data exchanged

Fiscal Year 2019-2020 Accomplishments:

- Three of the P3N Certified HIOs began sharing real-time inpatient (IP) ADT information with the P3N in addition to emergency department (ED) ADTs so that a patient’s care team can be alerted to the patient’s ED and IP encounter even if the patient is in a different HIO.
- Began collecting opioid use disorder (OUD) Continuity of Care Documents (CCD) in the DHS electronic clinical quality measure (eCQM) registry for select Medicaid OUD ED encounters.
- Three P3N HIOs began sharing discrete clinical documents in response to P3N queries.
- The new P3N Advance Directive Registry went into production in June 2020 to provide a statewide centralized registry available to healthcare providers in Pennsylvania.

Current Activity:

- Providing funding to support MA mammography image sharing project in one P3N HIO.
- Increasing IP ADT feeds and adding ambulatory ADTs in CY 2021.
6. Update the certification program

Fiscal Year 2019-2020 Accomplishments:
• The P3N HIE Trust Community Committee reviewed the P3N HIO Certification Package and added a new Downtime Notification Policy effective January 1, 2020.
• HIETCC also adjusted HIO insurance requirements to align with current insurance industry practices and added new P3N services.

Current Activity:
• In August 2020, the P3N HIE Trust Community Committee completed its annual review of the P3N HIO Certification Package and determined that no changes are required.
• Monitoring downtime notification policy compliance.
7. Offer expanded system access

Fiscal Year 2019-2020 Accomplishments:
• Medicaid FFS Case Managers began using the P3N Portal to improve the timeliness and completeness of their care plans for new and vulnerable enrollees.
• PA eHealth has been in discussions with the DOH Women Infant and Children (WIC) Program to provide their pediatric nutritionists with access to the P3N Portal to support a new telehealth model.
• PA eHealth awarded onboarding grant funding for the Department of Aging’s PACE Program to connect to a P3N Certified HIO.

Current Activity:
• The new P3N system will be integrated into the new MMIS, giving improved clinical and claims data access to DHS and the P3N participants.
• Providing patient access to their data through the P3N is anticipated in the new P3N system.
• Continuing discussions with DOH and Labor & Industry on providing program access to the P3N Portal.
Fiscal Year 2019-2020 Accomplishments:
• PA eHealth engaged in discussions with Maryland, West Virginia, and Delaware on options for alerting a patient’s home care team when the patient crosses state boundaries for health care services.
• Secured a no-cost contract change request with IBM to onboard the Chesapeake Regional Information System for our Patients (CRISP) to the P3N ADT Service.

Current Activity:
• Working with DHS, HIETCC, and CRISP on an ADT Service connection agreement with CRISP.
• Participating in meetings with the Sequoia Project, ONC’s Recognized Coordinating Entity for implementing the Trusted Exchange Framework and Common Agreement, to support health information exchange with a Qualified Health Information Network (QHIN) in the future.
