Header	Format	Doc_txn_format
Header	Version	Doc_txn_format_ver
Header	ECS Document #	Ecms_doc_id

## 2.0 Transaction Summary Report Requirements

### 2.1 Overview

The transaction summary report provides the submitter a status of the transaction that was submitted. The sections documented below give a high level description of the transaction, a sample layout of the report and the mappings of the field. The information documented in the sections below pertains to both versions of X12, version 4010A1 and 5010, unless otherwise noted. If multiple versions of X12, 4010A1 and 5010, or multiple transactions (837, 835, 270, 271, etc.) are submitted within one physical file, the Transaction Summary Report will be generated as one report and will be sorted based on the sort order in section 2.

#### 2.1.1 - 270 Healthcare Eligibility Benefit Inquiry

The 270 is used to request (inquire) information about health care coverage. The 270 is sent from a submitter (information receiver) to an information source organization.

The information receiver is the entity that is asking the questions in a 270 Eligibility or Benefit transaction. The information source is the entity that has the answer to the questions being asked in a 270 Eligibility or Benefit transaction.

##### 2.1.1.1 – 270 Transaction Summary by Status Page

## **2.1.2 - 271 Healthcare Eligibility Benefit Response**

The 271 is used to respond with coverage, eligibility, and benefit information. The 271 is from an information source organization to a submitter.

The information source is the entity that has the answer to the questions being asked in a 270 Eligibility or Benefit transaction.

### **2.1.2.1 - 271 Transaction Summary by Status Page**

The transaction summary by status page is designed to provide a status of the submission at a glance. This is the first page of each report.

```

#### **2.1.8 - 820 Premium Payment**

The 820 can be used in the following ways:

- Initiate an electronic payment that includes the remittance detail needed by the premium receiver to properly apply the payment.
- Initiate a payment without the remittance detail, and send the remittance detail separately to the premium receiver. The payment can be an electronic payment or a paper check.

### **2.1.8.1 - 820 Response Transaction Summary by Status Page**

The transaction summary by status page is designed to provide a status of the submission at a glance. This is the first page of each report.

```
+++++  
++++++ TRANSACTION SUMMARY BY STATUS +++++  
+++++
```

Total Txns:	1	Total Premiums:	\$775.35
Total Reject Txn:	0	Total Reject Premiums:	\$0.00
Total Accept Txn:	1	Total Accept Premiums:	\$775.35

'Total Txns': Total number of transactions sent within one submission

'Total Premiums': Total number of premiums sent within one submission

'Total Reject Txn': Total number of rejected transactions within one submission

'Total Reject Premiums': Total number of rejected premiums within one submission

'Total Accept Txn': Total number of accepted transactions within one submission

'Total Accept Premiums': Total number of accepted premiums within one submission

## **2.1.10 - 835 Remittance Payment**

The 835 can be used to make a payment, send an Explanation of Benefits (EOB) remittance advice, or make a payment and send an EOB remittance advice from a payer to a payee, either directly or through a DFI.

### **2.1.10.1 - 835 Transaction Summary by Status Page**

The transaction summary by status page is designed to provide a status of the submission at a glance. This is the first page of each report.

```
+++++
+++++ TRANSACTION SUMMARY BY STATUS ++++++
+++++
```

Total Txns:	2	Total Charges:	\$970.35
Total Reject Txn:	0	Total Reject Charges:	\$0.00
Total Accept Txn:	2	Total Accept Charges:	\$970.35

'Total Txns': Total number of transactions sent within one submission

'Total Charges': Total charges of transaction sent within one submission

'Total Reject Txn': Total number of rejected transactions within one submission

'Total Reject Charges': Total charges of rejected transactions within one submission

'Total Accept Txn': Total number of accepted transactions within one submission

'Total Accept Txn': Total charges of accepted transactions within one submission

## 4.0 Extract File Report (EFR) Requirements

The sections below document the field information, the field length and the report layout placement for the Reporting system for both X12 versions 4010A1 and 5010.

There are two versions of the Extract file which are both configurable. Each file layout is documented below. The only difference between the two versions is the field 'Patient First Name Initial' or 'Patient First Name'. For the 652 Extract, the field is only one (1) byte and for the 671 Extract, the field is the twenty.

### 4.1. Extract File Information and Length (Record Length 652)

The information below lists the section where the data will be placed, the field name, the tag name, the stored length and the printed length.

In order to see the X12 mappings for the Accept/Reject report, review the specific transaction documented in section 2 – Transaction Summary Report Requirements. For NCPDP mappings, review section 3.1.1 - NCPDP Field Source.

Section	Field Name	Extract Report
Header	Batch ID	8
Header	User ID	15
Header	Host Name	15
Header	Submission Status	2
Header	Report Version	9

### **4.1.1 Extract Layout**

The record length for each record is **652** bytes long. In the example provided below, D2AC450CECMSPC starts the beginning of each record.

## 4.2 Extract File Information and Length (Record Length 671)

The information below lists the section where the data will be placed, the field name, the tag name, the stored length and the printed length.

In order to see the X12 mappings for the Accept/Reject report, review the specific transaction documented in section 2 – Transaction Summary Report Requirements. For NCPDP mappings, review section 3.1.1 - NCPDP Field Source.
