ESC Supplement Extract for Managed Care Encounters Layout

Scope: This output file is an extract of Behavioral, CCR EPOMS, Physical, and Community Health Managed Care 837 and NCPDP Encounters which processed in PROMISe™ for the previous day where the Paid or Denied Encounter set at least one PROMISe™ Error Status Code (ESC). Any Behavioral, CCR EPOMS, Physical, and Community Health 837 or NCPDP Encounters that did not set any ESCs will not be in this extract.

Format: Fixed width, not delimited, and with EOF (end-of-file). The total record length is 153 characters.

Frequency: Daily.

File Name: ESCLIST[4 digit sequence].CCYYMMDD.XX.txt
- 4-digit sequence used to uniquely identify the file.
- CCYYMMDD is date the file is created for the MCO Plan.
  - CCYY = Year, MM = Month, DD = Day, and XX = Plan Code.

The ASCII text file (.txt) will be zipped due the size of the file.

Header Record - one record per extract.

Field Name	Field Length	Record Position	Data Type	Description
Header Indicator	3	1-3	CHAR	The character indicator of 'HDR' for header.
Filename	23	4-26	CHAR	The file name of this daily extract.
Date	8	27-34	CHAR	The date (CCYYMMDD) the extract was created.
Filler	61	35-153	CHAR	Blank spaces.

Detail Record – ICN record for each ESC that set on the encounter.

Field Name	Field Length	Record Position	Data Type	Description
Batch Filename	20	1-20	CHAR	The file name of the 837 or NCPDP batch the encounter was originally submitted in.
ICN	13	21-33	CHAR	The unique identifier of the encounter in PROMISe™.
