

**Managed Care Operations Memorandum  
Technology Assessment Group  
MCOPS MEMO # 11/2022-008**

**DATE:** November 3, 2022

**SUBJECT:** Technology Assessment Group (TAG) Coverage Decisions

**TO:** All Physical Health (PH) HealthChoices Managed Care Organizations (MCOs) - Statewide

**FROM:** Gwendolyn Zander, Director, Bureau of Managed Care Operations, Office of Medical Assistance Programs

---

**Purpose:**

The Office of Medical Assistance Programs (OMAP) is issuing this Operations Memorandum to provide MCOs coverage updates on new technologies as discussed in regular TAG meetings.

**Background:**

The TAG workgroup meets quarterly on the first Wednesday of February, May, August, and November to discuss issues and evidence-based research pertaining to evolving new technologies and previously reviewed technologies or services that were determined to be covered only through a program exception request. During the TAG meeting, decisions are made as to whether certain technologies or services will be covered under the Medical Assistance (MA) Program and the option under which it will be covered. TAG's coverage options are as follows:

- **Option # 1:** Indicates service, device, or procedure will be added to the MA Program Fee Schedule because of well-established medical evidence. MCOs or MA Fee-for-service (FFS) program may require prior authorization.
- **Option # 2:** Indicates service, device, or procedure is medically effective and safe under specific clinical circumstances. Medical evidence is available from small or medium-sized well-designed clinical trials or emerging in large clinical trials. MCOs and FFS will require the submission of a Program Exception request.

- **Option # 3:** Indicates service, device, or procedure may be medically effective under specific but very narrow clinical circumstances for a small number of patients. Medical evidence is limited but promising or not available in large clinical trials. MCOs and FFS will require the submission of a Program Exception request.
- **Option # 4:** Indicates service, device, or procedure has no proven clinical utility, there is no credible medical evidence, or is experimental/investigational. MCOs will require the submission of a Program Exception request.

**Discussion:**

Below is the updated list of codes/descriptions discussed at the August 3, 2022, TAG Meeting and the decision that was made:

<b>HCP/CS/CPT Code</b>	<b>Description</b>	<b>Decision</b>
CPT 92229	IDx-DR System:  Imaging of retina for detection or monitoring of disease; point-of-care automated analysis and report, unilateral or bilateral	Option #1

This memo is not intended to replace any existing Prior Authorization Review Processes currently being utilized; it is for informational/internal purposes only.

**Next Steps:**

MCOs should review this information against their existing coverage policies to assure they are consistent with or less restrictive than the TAG's decisions.

**Obsolete:**
