Community Health Choices Populations by Race and Ethnicity

The following pages look at Race and Ethnicity for the Community Health Choices (CHC) participants, by participant category. The first chart below displays the statewide race percentage breakouts for those CHC participants as well as current census data. The second chart displays the same source data by ethnicity classification. There are heat maps to depict the racial and ethnic breakdown by county and zip codes for Philadelphia county on later pages. If a participant is in a nursing facility and has a home outside of the nursing facility, the participant is counted in the county of the nursing facility.
