specific prior authorization guidelines associated with Uceris (budesonide). Uceris was removed from the Ulcerative Colitis Agents class of drugs on the MA Preferred Drug List (PDL) and added to the Glucocorticoids, Oral PDL class based on its mechanism of action and role in therapy. There are no other changes to the medical necessity guidelines.

The revisions to the guidelines to determine medical necessity of Ulcerative Colitis Agents were subject to public review and comment and subsequently approved for implementation by the Department.

### **PROCEDURE:**

The procedures for prescribers to request prior authorization of Ulcerative Colitis Agents are located in SECTION I of the Prior Authorization of Pharmaceutical Services Handbook. The Department will take into account the elements specified in the clinical review guidelines (which are included in the provider handbook pages in the SECTION II chapter related to Ulcerative Colitis Agents) when reviewing the prior authorization request to determine medical necessity.

As set forth in 55 Pa. Code § 1101.67(a), the procedures described in the handbook pages must be followed to ensure appropriate and timely processing of prior authorization requests for drugs that require prior authorization.

Prior authorization personnel will review the request for prior authorization and apply the clinical guidelines in Section B. above to assess the medical necessity of a prescription for an Ulcerative Colitis Agent. If the guidelines in Section B. are met, the reviewer will prior authorize the prescription.
