NPI and Paper Claim Forms CMS-1500 (Professional) UB-04 (Institutional)

As a result of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), the federal Department of Health and Human Services has mandated the use of the National Provider Identifier (NPI) number, which is the standard unique identifier for health care providers. Every health care provider, as defined by CMS, will be required to obtain and use an NPI number to enable provider identification on electronic transactions. HIPAA regulations adopt standards for format and content of certain electronic health transactions; they do not address the content of paper claims transactions. DHS will accept, but not require, the **NPI** on the revised paper forms, **CMS 1500 (08/05)** and **UB-04 (replacing the UB-92)**. See tables below.
